

Data Retention & Disposal Policy

Agentic Voice, Inc. — d/b/a MFunding.net | Momentum Funding

Document	Data Retention and Disposal Policy
Version	1.0
Effective Date	July 28, 2026
Next Review	July 28, 2027 (annual)
Owner / Approver	Ernesto Lee, Chief Executive Officer & Security Officer
Companion To	Information Security Policy v1.0

1. Purpose & Scope

This policy governs how long Agentic Voice, Inc. ("the Company") retains the data it collects and how that data is securely disposed of when it is no longer needed. It covers all consumer and business data processed by the Company, with particular attention to consumer financial data obtained through **Plaid Inc.** Our principle is data minimization: we keep personal and financial data only as long as there is a legitimate business or legal reason to do so, and then we delete or de-identify it.

2. Retention Schedule

Data Category	Retention Period	Basis
Bank data obtained via Plaid (transactions, statements, balances, account/routing details) — <i>funded deals</i>	Duration of the funding relationship + up to 7 years , then deleted	Financial-recordkeeping, tax, and dispute/audit obligations
Bank data obtained via Plaid — <i>declined, withdrawn, or inactive applications</i>	Deleted within 90 days of decline/withdrawal, or on request	No ongoing need; data minimization
Plaid access tokens / connection credentials	Revoked and deleted immediately on account disconnection or when data pulls are complete and no longer needed	Least-privilege; minimize credential exposure
Funding application & applicant PII (name, contact, EIN, business financials) — funded	Up to 7 years after the relationship ends	Legal, tax, and commission-recordkeeping
Applications / leads — declined or inactive	Up to 24 months of inactivity, then deleted or de-identified	Follow-up window; then minimization

Call recordings & call metadata	Up to 24 months	Quality assurance & dispute resolution
Marketing / outreach contact data	Until opt-out or 36 months of inactivity	Consent-based; honor opt-outs promptly
Application & security audit logs	Retained per managed-provider defaults (up to ~24 months)	Security monitoring & incident investigation
Automated backups	Cycled out on the managed provider's backup rotation	Disaster recovery; deleted data ages out of backups on rotation

Where a longer retention period is required by a specific law, regulation, funder contract, or an active legal hold, that requirement governs and supersedes the periods above for the affected records.

3. Deletion & Disposal Procedures

When data reaches the end of its retention period, or when a valid deletion request is received, the Company disposes of it as follows:

- **Plaid connections.** The Plaid Item is removed via Plaid's `/item/remove` API, which revokes the access token and terminates further access. The associated stored access token (held in the encrypted vault) is deleted.
- **Database records.** Records are deleted from the Supabase (PostgreSQL) database. Because the platform encrypts data at rest, deletion combined with provider key management renders data unrecoverable (crypto-erasure); deleted records age out of automated backups on the provider's rotation.
- **Stored files.** Documents in storage (bank statements, IDs, and other uploads) are deleted from their storage buckets, including the underlying storage objects.
- **CRM records.** Contact and conversation records held in GoHighLevel (GHL) are deleted upon a valid deletion request or at end of retention.
- **Disposal method.** Disposal is performed by secure deletion through provider APIs and crypto-erasure of managed encrypted storage. Any physical media, if ever used, is wiped or destroyed before disposal.

4. Consumer Data Access & Deletion Requests

Individuals may request access to, correction of, or deletion of their personal information — including data obtained through Plaid — and may disconnect a linked bank account at any time. Requests are submitted through either channel below and are actioned by the Security Officer:

- Email: sales@send.mfunding.net
- Web: the contact form at mfunding.net/contact

The Company verifies the requester's identity, then completes verified deletion requests within a reasonable period and consistent with applicable law, except where data must be retained to meet a legal, tax, or contractual obligation (in which case only the minimum required data is retained and the requester is informed).

5. Responsibilities & Review

- The **Security Officer** (Ernesto Lee, CEO) owns this policy, actions deletion requests, and confirms that data past its retention period is removed.
 - Retention and disposal practices are reviewed **annually**, alongside the quarterly access review, to confirm they remain accurate and compliant.
 - This policy is a companion to the Company's Information Security Policy and is maintained under version control.
-

Approved and adopted on behalf of Agentic Voice, Inc.:

Ernesto Lee — Chief Executive Officer &
Security Officer
